Our friends at The Health Department asked if we would kindly remind you that consuming raw or undercooked meats of any kind may increase your risk of food borne illness. Also, there may be small bones or shell fragments in some of the fresh fish or shellfish. Although raw oysters are very delicious, consuming raw oysters may cause severe illness and even death in persons with liver disease, cancer, and other chronic illnesses that weaken the immune system. Also, we cook with the highest quality of ingredients to provide you the best tasting food; while cooking, we do cook around all sorts of fun ingredients such as local dairy, eggs, soybean, fish, shellfish, and pork. If you are allergic to any of these, let us know and we'd love to make you something separately. We are not responsible for an individual's allergic reaction to our food. If you are unsure of your risk, consult your physician.
